- HTML files must include client-supported hosting for images and a proof for creative concept.
- A maximum animation length of 15 seconds; 3 times looping maximum; and a maximum of 24 fps for all animated GIF files. **NOTE:** Static images are preferred, as animated images do not work in some email clients. - Creative with a white background (#ffffff) must have a minimum 1-pixel border to differentiate ad from editorial content.
- The digital operations department is not responsible for any changes to ad creative; all changes must be made by the client and resubmitted for placement.
